

MAXFLO

3D LED Tube Light Swivel Tube type

Chip's Beam Angle Vs Swivel Angle Vs Lux

- Light Tube:**
1. Choose small chip beam angle 15,30,60 ,120degrees as projector lamp and light up area you need to protect your eyes.
 2. Choose big angle 120° for big light up area.
(wall wash lights / luminescent , light shade on wall)
 3. Different design LED tube light (can turn the tube & K/D driver)

Difference Beam Angle : 15 , 30, 60 ,120 degree . (the narrow angle 15 degree likes PAR light)

3D LED Tube Light Swivel type

Machinery Moving area Work area

The designer best choice is the 3D LED lights :

3 Points Balanced Maxflo lights + light shade + beam angle + swivel tube

* To select light's beam angle (15, 30,60 ,120 degree) to add Lux that light shade to your need.

* The low surface temperature to protect eyes or products and save energy or save light quantity.
